

Avongara Ojo

Evaluations

AKC Approved Basenji Judge – Dr. Donald Sturz 12-5-08

The overall look of this 3 year old male clearly indicates that he is a Basenji. Head proportions were correct but in need of refinement. This dog had exceptional front construction, which he used well in motion. Bone and substance were good. Feet were quite good in being knuckled and well padded. Balanced fore and aft. Could use a shorter loin, which would correct for length and create a squarer proportion. True coming and going, balanced in side gait but could (missing word? "use"?) more rear extension. Loose tail. Exceptional temperament (underlined for emphasis). Definitely has features to offer the gene pool.

Rating 3 Good

AKC Approved Basenji Breeder Judge -- Marianne Klinkowski 9-20-08

Solidly built, off square, plainly marked and clearly defined tricolor dog; well angulated front & rear with a very solid, level topline. Good fill in front. A very classic head with lovely short muzzle and proper skull/muzzle ratio; unfortunately, 4 incisors out of alignment however canines properly placed. Beautifully crafted small, well set ears. Pliant skin, lovely temperament. There is no question in my mind that this is a Basenji.

Rating 4 Very Good

Long-time Breeder – Doris Daniels 9-19-08

This correctly sized dog impressed me with his strong topline, small ears and excellent feet. He moves reasonably well on the down and back with good side gait. His tail set is acceptable with a single curl. He has a very outgoing, friendly temperament. Ojo is long in loin and his ears (while small) is not correctly shaped. His eyes, although dark are not the typical small almond shaped basenji eye.

All in all, Ojo displays breed type, and I feel he is worthy of inclusion in the stud book.

Rating 3 Good

Form for Native Stock Evaluator

Evaluator: AKC Approved Basenji Judge
